## ONE BOTTLE AT A TIME ▶

Recently launched Illinois-based company **Java & Co.** is a small-batch manufacturer of "boutique-bottled," coffee-infused syrups. The syrups are made using whole-roasted coffee beans and are void of corn syrup, added preservatives and other fillers, and they come in five flavors, including Original (coffee) and Original Dark (espresso). A small-batch item, the syrups are made in a state-certified kitchen—hand-mixed, hand-bottled and hand-packaged. 309/361-3276. [javaandco.com](http://javaandco.com)
